

QUALITY POLITICY

1_PS 6201
Rev. 2 16/07/2020
Pag. 1 di 1

Our Company pursues the corporate mission that puts **customer satisfaction first** and proceeds on the path of **increasing quality** of products and services and **innovation**, developing and consolidating operating practices with a view to continuous improvement.

In support of our growth path, we have decided to create, certify and maintain over time a quality management system compliant with the **UNI EN ISO 9001: 2015 standard** with the aim of **continuously improving operating results and satisfaction of the customer** in all its most significant aspects (understanding of the customer's requirements, quality of the products manufactured, delivery times and after-sales assistance), understanding and meeting all applicable mandatory requirements and making our **processes** more efficient and effective by monitoring their performance through the use of **suitable indicators**.

In order to achieve our goals, we recognize the **active involvement and communication** between all **internal and external resources** operating in the organization as essential, in order to make them fully aware of the importance of a management system that is concretely applied, documented and reproducible.

We are confident of the future that awaits us which, by proudly founding the roots in our history, will see us continuously strengthen our position as a global player and ideal partner for all customers in our market.
